

The CARC Party joins the national demonstration called in solidarity with Palestinian people that withstands the Zionist attack in Gaza Strip. It undertakes to carry out on national and international level a policy of common front with all the forces available in solidarity with Palestinian people's masses and against the criminal and genocidal strategies that Zionists and in general the imperialists are carrying out against them.

These strategies are the same that in the last century produced the slaughters in Guernica and in Warsaw ghetto, as premises of the Second World War. Then and now, the responsible of these strategies are enemies of the human kind.

Palestinian people's resistance against today enemies is the latest episode of a struggle lasting for half a century. It is an example for people's masses all over the world, and the battle of today is heroic as that of Stalingrad.

Palestinian resistance will win, and also our demonstration of the next 17th, we believe, will be a success exceeding expectations. So, it will help Palestinian people, but it will also confirm one more time the ability to react of our country's popular masses and of the communist, revolutionary and progressive forces who promote their mobilization against the extermination war the imperialist bourgeoisie is carrying out all over the world.
