

Against the new antidemocratic provocation of the Italian state

Â

The Communist Organization of Greece (KOE) denounces to the Greek and international progressive people the new provocation of the Italian state against communist and progressive militants. The searches in homes and cars of four Italian comrades by the Italian political police Digos, and the seizure of computers, cameras, mobile phones and printed materials, constitute one more antidemocratic and authoritarian attempt of the reactionary Italian government to terrorize the popular and workers movement under unfounded and ridiculous pretexts.

The Communist Organization of Greece (KOE) expresses its full solidarity to the comrades Vincenzo Cinque, Rosalba Romano, Fabrizio di Mauro and Angelo D'Arcangeli and their organizations, respectively the Struggling Workers Union (SLL), the Association for Proletarian Solidarity (ASP) and the CARC Party. We are confident that the new repressive provocation will be smashed and will prove, once again, unable to stop the popular struggles and the rebirth of the communist movement.
